#100yearspharmafuture

For over a 100 years the Life Sciences Industry is present in Oss. It started with the production of insulin and contraceptives. Today, with the newest techniques, we produce e.g. cancer immunotherapy and open innovation is at the core of our Pivot Park community.

All components are present in Oss: from fundamental R&D to the large-scale commercial production of medicines. We build on qualities, expertise and networks of decades. With a variety of companies, suppliers, scientific institutions, packaging and logistics near each other. Together we work to create a sustainable healthier future for all. We celebrate our achievements and look forward to our future. Read about it on www.100ypf.nl and join us.

Healthy work and life balance

The Netherlands ranks highly as a great place to live. Enjoying rich cultural offerings and an outstanding healthcare system. The city of Oss is located in the middle. Did you know that most pharmaceutical jobs in the Netherlands can be found here? Our expert and driven employees are our greatest asset and enjoy living here.

Oss offers on the one hand a compact city centre for shopping, restaurant visits, events and cultural amenities; museum, library, cinema. The railway station connects you with every big city in Europe. On the other hand, you reach the outskirts on your bike within 10 minutes from your workplace. The nearby Maashorst nature reserve is the largest natural area in Brabant. Ideal for hiking, cycling and swimming. Or bike along the meandering Meuse River and visit the historical fortified towns with monuments and lovely squares. You are more than welcome to Oss!
